STATEMENT OF THE BOARD OF MANAGEMENT

The Board of Management of Tracodi Construction Holdings Joint Stock Company (hereinafter referred to as “the Company”) presents this statement together with the Interim Financial Statements for the first 6 months of the fiscal year ending 31 December 2026.

Responsibilities of the Board of Management

The Board of Management is responsible for the preparation of the Interim Financial Statements that give a true and fair view of the interim financial position, the interim financial performance and the interim cash flows of the Company during the period. In order to prepare these Interim Financial Statements, the Board of Management must:

- select appropriate accounting policies and apply them consistently;
- make judgments and estimates reasonably and prudently;
- state whether applicable accounting standards have been followed or not, and all the differences subject to any material departures are disclosed and explained in the Interim Financial Statements;
- prepare the Interim Financial Statements of the Company on a going-concern basis unless it is inappropriate to presume that the Company will continue in business;
- design and implement effectively the internal control system to minimize the risks of material misstatements due to fraud or error in the preparation and presentation of the Interim Financial Statements.

The Board of Management is responsible for ensuring that proper accounting records are maintained to accurately reflect, with reasonable accuracy at any time, the financial position of the Company and that such accounting records comply with the applicable accounting framework. The Board of Management is also responsible for safeguarding the Company’s assets and, accordingly, for taking reasonable measures to prevent and detect fraud and other irregularities.

The Board of Management confirms that it has complied with the above requirements in the preparation of these Interim Financial Statements.

Statement of the Board of Management

In the Board of Management’s opinion, the Interim Financial Statements give a true and fair view of the financial position of the Company as of 30 June 2026 and of its financial performance and cash flows for the first 6 months of the fiscal year ending 31 December 2026, in conformity with the Vietnamese Accounting Standards, the Vietnamese Enterprise Accounting System and relevant statutory requirements on the preparation and presentation of the Interim Financial Statements.

For and on behalf of the Board of Management,

Le Huynh Thuong Minh
Chief Executive Officer

No. 1.1355/26/TC-AC

REPORT ON THE REVIEW OF INTERIM FINANCIAL INFORMATION**To: THE SHAREHOLDERS, THE BOARD OF DIRECTORS AND THE BOARD OF MANAGEMENT
TRACODI CONSTRUCTION HOLDINGS JOINT STOCK COMPANY**

We have reviewed the accompanying Interim Financial Statements of Tracodi Construction Holdings Joint Stock Company (hereinafter referred to as "the Company"), which were prepared on 27 August 2026 (from page 08 to page 79), comprising the Interim Statement of Financial Position as of 30 June 2026, the Interim Income Statement, the Interim Cash Flow Statement for the first 6 months of the fiscal year ending 31 December 2026 and the Notes to the Interim Financial Statements.

Responsibility of the Board of Management

The Company's Board of Management is responsible for the preparation, true and fair presentation of the Company's Interim Financial Statements in accordance with the Vietnamese Accounting Standards, the Vietnamese Enterprise Accounting System and relevant statutory requirements on the preparation and presentation of the Interim Financial Statements; and responsible for such internal control as the Board of Management determines necessary to enable the preparation and presentation of the Interim Financial Statements to be free from material misstatement due to fraud or error.

Responsibility of Auditors

Our responsibility is to express a conclusion on the accompanying Interim Financial Statements. Because of the matters described in the "Basis for disclaimer of conclusion" paragraph, we have not been able to obtain sufficient and appropriate evidence to provide a basis for a conclusion on the Interim Financial Statements.

Basis for disclaimer of conclusion

- We have been unable to obtain sufficient and appropriate evidence to assess the recoverability of the following investments and receivables:
 - The investment in the HISCH2124001 bonds, issued by Helios Service and Investment Joint Stock Company with a carrying amount of VND 100,000,000,000 as of 30 June 2026 and 31 December 2025 (see Note No. V.2b in the Notes to the Interim Financial Statements).
 - The investments in TCD Plus Joint Stock Company (a subsidiary) and Thanh Nguyen Energy Development and Investment Co., Ltd. (an associate) with the respective carrying amounts of VND 200,000,000,000 and VND 94,074,073,156 as of 30 June 2026 (as of 31 December 2025: VND 200,000,000,000 and VND 93,869,960,421 respectively) (see Note No. V.2c in the Notes to the Interim Financial Statements).
 - Some other short-term and long-term receivables in relation to capital contributions under Business Cooperation Contract ("BCC"), and BCC profit receivable presented under items "Short-term held-to-maturity investments" (code 123) and "Long-term held-to-maturity investments" (code 265) with the respective carrying amounts of VND 574,832,701,414 and VND 213,500,000,000 as of 30 June 2026 (as of 31 December 2025: VND 557,832,701,414 and VND 230,500,000,000 respectively).

With the available documents and information, we are unable to assess and determine: (i) if the investments are impaired; (ii) the recoverability of BCC capital contributions and profit receivable; and (iii) the provisions for impairment of financial investments and allowances for doubtful debts (if any) to be made. Consequently, we cannot quantify the impact on items "Provisions for impairment of long-term investments in other entities" and "Provisions for impairment of short-term/long-term held-to-maturity investments" as of 30 June 2026 and 31 December 2025, "Financial expenses" for the first 6 months of 2026, as well as the impact (if any) on other relevant items in the Interim Financial Statements for the first 6 months of the fiscal year ending 31 December 2026.

- As of 30 June 2026, the Company has monitored cash advances to contractors under long-standing construction contracts for which the work volume has not yet been accepted, with a total carrying amount of VND 2,211,174,284,913 (as of 31 December 2025: VND 2,421,842,818,399), presented under item "Short-term advances to suppliers" (code 132). We have not been able to obtain sufficient and appropriate evidence to determine the economic substance of these transactions and to assess the recoverability and the extent of any impairment loss (if any) to be recognized. Therefore, we are unable to express a conclusion on the presentation and classification of item "Short-term advances to suppliers", nor can we quantify the impact (if any) on items "Allowances for short-term doubtful debts", "General and administrative expenses" and other relevant items in the Interim Financial Statements for the first 6 months of the fiscal year ending 31 December 2026.
- The Company operates primarily in the construction sector and executes construction contracts for project developers. The majority of the construction work is subcontracted to subcontractors. We have not been able to obtain sufficient and appropriate evidence on the projects' construction progress as of 30 June 2026 and 31 December 2025, recoverability and net realizable value of construction-in-progress costs with the carrying amount of VND 659,073,389,932 as of 30 June 2026 (as of 31 December 2025: VND 658,173,200,552) (see Note No. V.7 in the Notes to the Interim Financial Statements). Additionally, the information we obtained indicated that the developers of the projects currently under construction by the Company are facing significant difficulties in their business operations. Accordingly, we are unable to determine these developers' solvency over the construction volume done by the Company and the corresponding provisions required (if any). Consequently, we cannot quantify the impact on items "Allowances for devaluation of inventories" as of 30 June 2026 and 31 December 2025, "Cost of sales" for the first 6 months of 2026, nor the impact (if any) on other relevant items in the Interim Financial Statements for the first 6 months of the fiscal year ending 31 December 2026.
- The Company has not reconciled and obtained confirmations for some balances with carrying amounts as of 30 June 2026 and 31 December 2025, as follows:

	As of 30/6/2026 VND	As of 31/12/2025 VND	Notes
Short-term trade receivables	73,749,377,457	-	V.3a
Advances to suppliers	113,806,258,426	93,886,867,030	V.4
Trade payables	191,108,755,311	65,634,322,578	V.12a
Advances from customers	52,733,825,759	-	V.13
Other short-term payables	490,000,000,000	490,000,000,000	V.17a

The alternative procedures also cannot provide us with sufficient and appropriate evidence regarding the existence and accuracy of these balances. Consequently, we are unable to express a conclusion on these balances as of 30 June 2026 and 31 December 2025. We also cannot determine the impact (if any) of this matter on other relevant items in the Interim Financial Statements for the first 6 months of the fiscal year ending 31 December 2026.

- The list of related parties and transactions along with balances related to these related parties has been presented in Note No. VII.1 and other relevant disclosures in the Notes to the Interim Financial Statements. However, the Company entered into business cooperation transactions and provided advances to other companies for which, we have not been able to obtain sufficient and appropriate evidence. This means that we cannot determine the nature of the relationship between the Company and these companies nor can we assess if these companies are related parties that have not been identified and disclosed in accordance with the requirements of the Vietnamese Accounting Standard No. 26 and the Vietnamese Standard on Auditing No. 550. Accordingly, we are unable to express a conclusion on the completeness of the list of related parties and transactions along with balances related to these parties in Note No. VII.1 and other relevant disclosures in the Notes to the Interim Financial Statements for the first 6 months of the fiscal year ending 31 December 2026.

6. Headcount

As of the end of the financial period, the Company's headcount is 26 (headcount at the beginning of the year: 28).

7. Statement of information comparability on the Interim Financial Statements

The corresponding figures of the previous period are comparable with the figures of the current period.

The accounting period from 01 January 2026 to 31 December 2026 is the first fiscal year in which the Company has applied the Vietnamese Enterprise Accounting System, which was issued together with the Circular No. 99/2025/TT-BTC dated 27 October 2025 of the Ministry of Finance ("Circular 99") in replacement to the Circular No. 200/2014/TT-BTC dated 22 December 2014 ("Circular 200"). Accordingly, certain items in the Interim Financial Statements have been reclassified and renamed in accordance with the new regulations. The figures in the "Beginning balance" column and the "Previous period" column in the Interim Financial Statements have been restated in accordance with the new classifications and names specified in Circular 99 to ensure comparability (see Note No. VII.3). These changes do not affect the Company's total assets, total liabilities, owner's equity and after-tax profit.

According to Decision No. 590/QĐ-SGDHCM dated 08 July 2026 of the Ho Chi Minh City Stock Exchange, the Company's shares were delisted from the Ho Chi Minh City Stock Exchange (HOSE) with effect from 15 July 2026.

The Company's shares are currently registered for trading on the UPCoM (Unlisted Public Company Market) of the Hanoi Stock Exchange under the stock code "TCD", according to Decision No. 961/QĐ-SGDHN dated 17 July 2026 issued by the Hanoi Stock Exchange. The first trading date was 24 July 2026.

On 20 July 2026, the Hanoi Stock Exchange issued Decision No. 973/QĐ-SGDHN regarding the imposition of trading restrictions on the Company's TCD shares with effect from 24 July 2026.

II. ACCOUNTING PERIOD, ACCOUNTING CURRENCY UNIT

1. Accounting period

The fiscal year of the Company is from 01 January to 31 December annually.

2. Accounting currency unit

The accounting currency unit is Vietnamese Dong (VND) because the Company's transactions are primarily made in VND.

III. APPLICABLE ACCOUNTING STANDARDS AND SYSTEM

1. Applicable Accounting System

The Company applies the Vietnamese Accounting Standards, the Vietnamese Enterprise Accounting System, which were issued together with Circular 99 and other Circulars guiding the implementation of Vietnamese Accounting Standards of the Ministry of Finance in preparation and presentation of the Interim Financial Statements.

2. Statement of the compliance with the Accounting Standards and System

The Company's Board of Management has ensured to comply with all the requirements of the Vietnamese Accounting Standards, the Vietnamese Enterprise Accounting System, which were issued together with Circular 99 as well as other Circulars guiding the implementation of Vietnamese Accounting Standards of the Ministry of Finance in the preparation and presentation of the Interim Financial Statements.

IV. APPLICABLE ACCOUNTING POLICIES, ACCOUNTING ESTIMATES AND RELEVANT LEGAL REQUIREMENTS

1. Basis of preparation

The Interim Financial Statements are prepared on the accrual basis (except for the information related to cash flows), using the historical cost principle and the going-concern assumption.

2. Foreign currency transactions

Transactions denominated in foreign currencies are translated at the spot exchange rate at the date of transaction. The balances of monetary items denominated in foreign currencies at the reporting date (excluding foreign currency-denominated receivables for which an allowance for doubtful debts has been made) are revalued at the average buying and selling rates applicable to wire transfer of Vietnam Joint Stock Commercial Bank for Industry and Trade (VietinBank) (where the Company regularly conducts transactions).

Exchange differences arising from the transactions denominated in foreign currency during the period, are recognized in financial income (if a gain) or financial expenses (if a loss). Exchange differences arising from the revaluation of foreign currency-denominated monetary items at the reporting date are presented on the basis of net amount of total gains and total losses arising from the revaluation of such items and are recognized in financial income (if a gain) or financial expenses (if a loss).

3. Cash and cash equivalents

Cash includes cash on hand and cash in bank. Cash equivalents are short-term investments with a maturity of three months or less from the date of investment (calculated from the date of purchase to the maturity date), which can be readily converted into a known amount of cash and are not subject to significant risks in conversion to cash at the reporting date. Restricted cash and cash equivalents are not presented under this item, but under the items "Other current assets" or "Other non-current assets", depending on the duration of the restriction.

4. Financial investments

Trading securities

Investments classified as trading securities are those held by the Company for the trading purpose with the aim of making profit from price differences.

Trading securities are initially recognized at the fair value of the payments made at the transaction date. Transaction costs directly attributable to the acquisition of trading securities (if any), such as brokerage fees, transaction fees, information provision fees, taxes and bank charges, etc., are recognized as financial expenses during the period. While holding the securities, the Company does not reclassify trading securities to held-to-maturity investments, or vice versa.

The recognition date for trading securities is the date the Company obtains ownership rights, specifically as follows:

- For listed securities: recognized at the time of order-matching (T+0).
- For unlisted securities: recognized at the time of legally obtaining ownership in accordance with applicable laws and regulations.

Interest, dividends and profit incurred prior to the acquisition of trading securities are deducted from the cost of such securities. Interest, dividends and profit incurred after the acquisition of such securities are recorded in the Company's financial income. Dividends received in the form of shares are accounted for by tracking only the increase in the number of shares held, with no recognition of the value of the shares received.

A provision for impairment of trading securities is established for each type of securities traded on the market and whose fair value is lower than its cost. The fair value of trading securities is measured as follows:

- For listed securities or securities whose fair value can be reliably determined, the provision is based on the market value of the securities at the end of the accounting period.

INTERIM FINANCIAL STATEMENTS

For the first 6 months of the fiscal year ending 31 December 2026

Notes to the Interim Financial Statements (cont.)

- For shares listed on the stock market or shares registered for trading on UPCoM without transactions within 30 days prior to the date of provision, the shares which are delisted, canceled or suspended from trading: an impairment provision is recognized based on the losses incurred by the investee, with the provision amount determined by multiplying the Company's actual paid-in ownership interest (%) in the investee at the end of the accounting period by the difference between the actual capital contributed by all owners and the equity of investee at the same date.

Any increase or decrease in the provisions for impairment of trading securities required to be recognized as of the reporting date is recorded into financial expenses.

Gain or loss from transfer of trading securities is recognized into financial income or financial expenses. Cost is determined using the moving weighted average method. Any change in the method used to determine the cost of trading securities shall be treated as a change in accounting policies.

Held-to-maturity investments

An investment is classified as a held-to-maturity investment when the Company has the intention and ability to hold it to maturity. The Company's held-to-maturity investments include term deposits, bonds, and held-to-maturity loans for the purpose of collecting periodic interest and other held-to-maturity investments or of a similar nature, and do not include derivative instruments.

Held-to-maturity investments are initially recognized at cost, including the acquisition cost and directly attributable transaction costs (such as transaction fees, brokerage commissions, etc.). Interest accrued prior to the acquisition date is deducted from the cost of the investment upon initial recognition. After the initial recognition, these investments are measured at cost. Interest income earned after the acquisition date is recognized in financial income using accrual basis.

When there is reliable evidence proving that a part or the whole investment cannot be recovered and the loss is reliably measured, the loss is recognized as financial expenses during the period and directly deducted from the investment costs. If the evidence of loss diminishes or no longer exists in a subsequent period, the previously recognized loss is reversed and recognized in financial income for that period.

Investments in subsidiaries and associates

Subsidiaries

A subsidiary is an entity controlled by the Company. Control is achieved when the Company has the ability to control the financial and operating policies of the investee in order to obtain economic benefits from the activities of that enterprise.

Associates

An associate is an entity over which the Company has significant influence but not control over its financial and operating policies. Significant influence is demonstrated by the right to participate in decisions regarding the financial and operating policies of the investee but not to control these policies.

Notes to the Interim Financial Statements (cont.)

Initial recognition

Investments in subsidiaries and associates are initially recognized at cost, comprising acquisition cost or capital contributions plus any directly attributable transaction cost (such as transaction costs and fees for brokerage, consultancy, audit, other charges, taxes and bank charges among others). In case the Company borrows funds to invest in subsidiaries and associates, the interest expenses are recognized in the financial expenses and are not capitalized. Where an investment is acquired through the transfer of non-monetary assets, the cost of the investment is measured at the fair value of the non-monetary assets at the acquisition date. Following initial recognition, these investments are subsequently measured at cost.

Dividends and profits incurred prior to the acquisition of investments are deducted from the investment costs. Dividends and profits incurred after the acquisition of investments are recorded into the Company's financial income. Dividends received in the form of shares are accounted for by tracking only the increase in the number of shares held, with no recognition of the value of the shares received.

Provisions for impairment of investments in subsidiaries and associates

A provision for impairment of investments in subsidiaries and associates is recognized when the subsidiaries and associates incur losses or the investment is impaired and the Company might incur a loss of capital. The provision amount is determined by multiplying the Company's actual paid-in ownership interest (%) in the subsidiaries and associates at the end of the accounting period by the difference between the actual capital contributed by all owners and the equity of subsidiaries and associates at the same date. If the subsidiaries and associates are consolidated into the Consolidated Financial Statements, the basis for impairment provisions is the Consolidated Financial Statements.

Any increase or decrease in the provisions for impairment of investments in subsidiaries and associates required to be recognized as of the reporting date is recorded into financial expenses.

Investments in equity instruments of other entities

Investments in equity instruments of other entities comprise investments in equity instruments over which the Company does not have control, joint control or significant influence over the investees.

Investments in equity instruments of other entities are initially recognized at cost, comprising acquisition cost or capital contributions plus any directly attributable transaction cost (such as transaction costs and fees for brokerage, consultancy, audit, other charges, taxes and bank charges among others). In case the Company borrows funds to invest in equity instruments of other entities, the interest expenses are recognized in the financial expenses and are not capitalized. Where an investment is acquired through the transfer of non-monetary assets, the cost of the investment is measured at the fair value of the non-monetary assets at the acquisition date. Following initial recognition, these investments are subsequently measured at cost.

Dividends and profits incurred prior to the acquisition of investments are deducted from the investment costs. Dividends and profits incurred after the acquisition of investments are recorded into the Company's financial income. Dividends received in the form of shares are accounted for by tracking only the increase in the number of shares held, with no recognition of the value of the shares received.

INTERIM FINANCIAL STATEMENTS

For the first 6 months of the fiscal year ending 31 December 2026

Notes to the Interim Financial Statements (cont.)

Provisions for impairment of investments in equity instruments of other entities are made as follows:

- For investments in listed shares or investments whose fair value can be reliably determined, the provision is based on the market value of the shares.
- For investments for which fair value cannot be reliably determined at the reporting date, an impairment provision is recognized based on the losses incurred by the investee, with the provision amount determined by multiplying the Company's actual paid-in ownership interest (%) in the investee at the end of the accounting period by the difference between the actual capital contributed by all owners and the equity of investee at the same date.

Any increase or decrease in the impairment provision for investments in equity instruments of other entities required to be recognized as of the reporting date is recorded into financial expenses.

5. Receivables

Receivables are recognized at their carrying amounts less allowances for doubtful debts.

The classification of receivables as trade receivables and other receivables is made according to the following principles:

- Trade receivables represent receivables of a commercial nature arising from purchase and sale transactions between the Company and customers who are independent to the Company.
- Other receivables represent receivables of a non-commercial nature that do not arise from purchase and sale transactions.

Receivables are tracked in details by subject, term and original currency. The trade receivables and other receivables are classified as short-term and long-term items in the Statement of Financial Position on the basis of their remaining term as of the reporting date.

Allowance is made for each doubtful debt on the basis of estimated loss.

Increases or decreases in the obligatory allowance for doubtful debts as of the reporting date are recorded into general and administrative expenses.

6. Inventories

Inventories are stated at the lower of cost and net realizable value.

Cost of inventories is determined as follows:

- For materials: Costs comprise costs of purchases and other directly attributable costs incurred in bringing the inventories to their present location and conditions.
- Work-in-process costs: Costs comprise costs directly attributable to the construction of projects.

Inventory costs are determined using the weighted average method and recorded in line with the perpetual method.

Net realizable value is the estimated selling price of inventories in the ordinary course of business less the estimated costs of completion and the estimated costs necessary to make the sale.

INTERIM FINANCIAL STATEMENTS

For the first 6 months of the fiscal year ending 31 December 2026

Notes to the Interim Financial Statements (cont.)

Allowance for devaluation of inventories is recognized for each item or each service in progress when their costs exceed their net realizable values. Increases or decreases in the allowance as of the reporting date are recorded into costs of sales.

Spare parts, standby equipment held for use for more than 12 months or beyond the Company's normal operating cycle, and work in progress with production or conversion periods extending beyond the normal operating cycle, are not classified as inventories but are presented as non-current assets in the Statement of Financial Position.

7. Tangible fixed assets

Tangible fixed assets are presented at historical cost minus any accumulated depreciation. Historical cost of tangible fixed assets comprises all costs incurred by the Company to acquire the assets up to the time when it is brought to its working condition for its intended use.

Subsequent costs are added to historical cost of fixed assets only if it is probable that future economic benefits associated with the asset will flow to the Company. Subsequent costs that do not meet the above conditions will be recognized as operation costs during the period. Costs of routine repairs and maintenance of tangible fixed assets are recognized into operation costs in the period in which they are incurred. For fixed assets that must undergo periodic repairs and maintenance in accordance with technical requirements, significant expenses incurred for repairing and maintaining these fixed assets are recognized as deferred expenses and amortized gradually into operation costs until the next routine repair or maintenance period.

Upon disposal or liquidation of a tangible fixed asset, its historical cost and accumulated depreciation are derecognized, then any gain or loss resulting from such disposal is included in the income or the expenses during the period.

Tangible fixed assets are depreciated on a straight-line basis over their estimated useful lives. The useful lives and depreciation methods are reviewed at least at the end of each fiscal year and adjusted as necessary. The depreciation years applied are as follows:

<u>Fixed assets</u>	<u>Years</u>
Buildings and structures	05 – 15
Machinery and equipment	02 – 03
Vehicles	05 – 10
Office equipment	03 – 05

8. Intangible fixed assets

Intangible fixed assets are presented at their initial cost minus any accumulated amortization.

The Company's intangible fixed asset consists of computer software. Costs directly attributable to computer software that is not an integral part of the related hardware are capitalized. The cost of computer software includes all directly attributable costs incurred by the Company up to the date the software is available to use. The computer software is amortized on a straight-line basis over 3 to 5 years.

Upon disposal or liquidation of an intangible fixed asset, its initial cost and accumulated amortization are derecognized, then any gain or loss resulting from such disposal is included in the income or the expenses during the period.

The useful lives and amortization methods are reviewed at least at the end of each fiscal year and adjusted as necessary.

INTERIM FINANCIAL STATEMENTS

For the first 6 months of the fiscal year ending 31 December 2026

Notes to the Interim Financial Statements (cont.)

9. Construction in progress

Construction in progress reflects costs directly related to assets under construction, machinery and equipment under installation, including borrowing costs capitalized in accordance with Vietnamese Accounting Standard No. 16 — Borrowing Costs ("VAS 16"). These assets are recorded at historical cost and are not depreciated until they are available for use. Upon completion, all costs are transferred to the appropriate asset categories based on their intended use, including tangible fixed assets, intangible fixed assets, investment property or inventories, and depreciation/amortization commences when the assets are available for use.

Costs of upgrades and renovations of fixed assets in progress are accounted for separately and, upon completion, are added to the historical cost of the corresponding fixed assets.

Repair and maintenance expenses for fixed assets incurred on a regular basis to maintain the assets in their normal operating condition are recognized in operating expenses during the period. For fixed assets that must undergo periodic repair and maintenance in accordance with technical requirements, the related costs are accumulated separately. Upon completion, the expenses are recognized as deferred expenses and amortized to operating expenses over the period until the next scheduled repair or maintenance.

10. Business Cooperation Contract

A Business Cooperation Contract ("BCC") is a contractual agreement between two or more parties to jointly conduct economic activities without establishing a separate legal entity. The applicable accounting method is determined based on the substance of each arrangement, and in particular, whether the parties have joint control over the relevant activities. The joint control exists when decisions relating to the relevant activities of the BCC require the consent of all parties sharing control, irrespective of their respective ownership interest or the legal form of the arrangement.

In all cases, where the Company receives cash or assets contributed by other parties to the BCC, such amounts are recognized as liabilities and are not recognized as owner's equity.

BCCs with joint control

Depending on the nature and form of the contract, the Company applies the appropriate accounting method for one of the following three forms of joint control:

BCCs in the form of jointly controlled assets

The Company recognizes in its Financial Statements:

- The Company's share of the jointly controlled assets, classified according to the nature of assets.
- Liabilities separately incurred by the Company and its share of joint liabilities to be borne.
- Income from the sale or use of the Company's allocated share of output.
- Expenses incurred in connection with the BCC.

BCCs in the form of jointly controlled operations

This form of cooperative arrangement does not result in the establishment of a separate legal entity. The Company recognizes the following in its Financial Statements:

- Assets controlled by the Company.
- Liabilities incurred by the Company.
- Its share of revenue from the sale of goods or provisions of services generated by the BCC.
- Expenses incurred by the Company in connection with the BCC.

INTERIM FINANCIAL STATEMENTS

For the first 6 months of the fiscal year ending 31 December 2026

Notes to the Interim Financial Statements (cont.)

BCCs under the post-tax profit-sharing arrangement

Under this arrangement, the parties are entitled to share in the profits of the BCC only to the extent that the BCC generates profits and are responsible for their agreed share of any losses incurred by the BCC.

Where the Company is responsible for the accounting for tax purposes and the tax finalization of the BCC, the Company records all revenue and expenses incurred by the BCC in its accounting records for the purpose of determining the BCC's operating results and tax liabilities. However, the Company recognizes in its Income Statement only the portion of revenue and expenses corresponding to its contractual share of the BCC's results.

Where the Company is not responsible for the accounting for tax purposes and the tax finalization of the BCC, the Company recognizes in its Income Statement its share of the revenue and expenses of the BCC, based on the Revenue and Expense Allocation Schedule provided by the party responsible for the BCC's accounting.

Accounting upon the termination of a jointly controlled BCC or the Company's withdrawal from the BCC

For BCCs in the form of jointly controlled assets and jointly controlled operations, the assets and liabilities are recognized at the agreed value upon liquidation. Any difference between the agreed value and the corresponding carrying amount is recognized as income or expenses in the period.

For BCCs under the post-tax profit-sharing arrangement, the party responsible for the BCC's accounting settles all assets and liabilities recorded in the BCC's accounting records, determines the liquidation result and allocate such results to the participating parties in accordance with the contractual profit-sharing ratio. The portion allocated to the Company is recognized as income or expense in the period.

BCCs without joint control

Where the Company participates in a BCC but does not have joint control over the BCC, this participation is recognized as a financial investment at cost (representing the value of the assets, cash or cash equivalents actually contributed to the BCC) and is classified as short-term or long-term investment, based on its remaining term as of the reporting date. Distribution of profits from the BCC are recognized as financial income when the Company is entitled to receive such distributions. Provisions for losses (if any) are recognized in accordance with the applicable regulations on provisions for losses on investments in other entities (see Note No. IV.4).

Where the BCC specifies that the participating parties are entitled to fixed benefits regardless of the BCC's performance results, the Company accounts for the transaction in accordance with the economic substance of the BCC, specifically:

- Where the substance of the BCC is a lease of assets: if the Company is responsible for accounting and tax finalization for the BCC, the transaction is accounted for as a lease of assets; if the Company is not responsible for accounting and tax finalization for the BCC, the transaction is accounted for as a letting of assets.
- Where the substance of the BCC is a borrowing arrangement: if the Company is responsible for the accounting and tax finalization for the BCC, the arrangement is accounted for as a borrowing; if the Company is not responsible for the accounting and tax finalization for the BCC, the transaction is accounted for as a lending.

11. Payables and accrued expenses

Payables and accrued expenses are recognized for amounts to be paid in the future in respect of goods and services received. Accrued expenses are recognized based on reasonable estimates of the amounts payable.

TRACODI CONSTRUCTION HOLDINGS JOINT STOCK COMPANY

Address: No. 89 Cach Mang Thang Tam Street, Ben Thanh Ward, Ho Chi Minh City

INTERIM FINANCIAL STATEMENTS

For the first 6 months of the fiscal year ending 31 December 2026

Notes to the Interim Financial Statements (cont.)

Payables are classified as trade payables, accrued expenses and other payables based on the following principles:

- Trade payables represent liabilities of a commercial nature arising from the purchase of goods, services or assets, where the suppliers are independent third parties of the Company.
- Accrued expenses represent liabilities for goods and services received from suppliers or provided to customers during the period, for which payment has not yet been made due to insufficient supporting and accounting documentation, as well as employee entitlements such as accrued annual leave and other accrued operation costs (such as costs incurred during seasonal production interval and interest expenses).
- Other payables represent liabilities of a non-commercial nature that do not arise from the purchase, sales of goods or provisions of services.

Payables and accrued expenses are presented as short-term or long-term in the Statement of Financial Position based on their remaining maturities as of the reporting date.

12. Ordinary bonds

Ordinary bonds are bonds that do not carry conversion rights into equity. Ordinary bonds include bonds that cannot be converted into shares or those can be converted into an indefinite number of shares as of the maturity date (due to the dependence on market value of shares as of the maturity date).

The carrying amount of ordinary bonds is presented on a net basis at the par value of the bonds less any bond discount plus any bond premium. The discount or premium is determined and recognized at the time of issuance. After issuance, changes in market interest rates do not affect the recognized discount or premium.

The Company separately tracks bond discounts and bond premiums for each issuance of ordinary bonds and the allocation of such discounts and premiums in determining borrowing costs recognized as expenses or capitalized in each period, as follows:

- Bond discounts are amortized and recognized as borrowing costs in each period over the term of the bonds.
- Bond premiums are amortized and recognized as a reduction of borrowing costs in each period over the term of the bonds. If the portion of the premiums allocated in a given period exceed the bond interest payable at the nominal interest rate for that period, the difference is recognized as financial income.

The amortization of bond discounts or premiums is determined using either the effective interest method or the straight-line method:

- Under the effective interest method: the amount of bond discount or premium amortized in each period represents the difference between the interest expense for the period (calculated by multiplying the carrying amount of the bonds at the beginning of the period with the effective interest rate) and the nominal interest payable for that period.
- Under the straight-line method: the bond discount or premium is amortized evenly over the term of the bonds.

Bond issuance costs are amortized over the term of the bonds using either the straight-line method or the effective interest method and are recognized as financial expenses or capitalized, depending on their intended use.

Where the issuance of ordinary bonds is unsuccessful, the issuance costs are usually allocated to both the successfully and unsuccessfully issued ordinary bonds on a pro rata basis. The bond issuance costs allocated to unsuccessfully issued ordinary bonds is recognized as financial expenses for the period.

INTERIM FINANCIAL STATEMENTS

For the first 6 months of the fiscal year ending 31 December 2026

Notes to the Interim Financial Statements (cont.)

13. Owner's capital

The owner's capital is recorded according to the actual amounts invested by the shareholders.

Share premiums

Share premiums recognized comprise:

- The excess of the issuance price over the par value of shares issued in an IPO or additional issuance.
- The difference between the repurchase price and the re-issuance price of the Company's own shares.
- The excess of the principal of convertible bonds over the par value of the additional shares issued upon conversion together with the full value of the bond conversion options, which is transferred to share premiums, regardless of whether the bondholders exercise their options or not.
- The excess of the actual amount received for capital contributions over the corresponding capital amount stated in the Company's Charter.

Directly attributable costs incurred in connection with a successful share issuance are deducted from share premiums. Costs incurred in connection with an unsuccessful share issuance are recognized as financial expenses during the period.

14. Recognition of revenue and income

Revenue from sales of merchandise

Revenue from sales of merchandise shall be recognized when the Company satisfies its contractual obligations by transferring control of the merchandise and finished goods to the customer, provided that all of the following conditions are met:

- The Company transfers most of risks and benefits incident to the ownership of merchandise to customers.
- The Company retains neither continuing managerial involvement to the degree usually associated with ownership nor effective control over the merchandise sold.
- The amount of revenue can be measured reliably.
- The Company received or shall probably receive the economic benefits associated with sale transactions.
- The cost incurred in respect of the sale transaction can be measured reliably.

Revenue from provisions of services

Revenue from provisions of services shall be recognized when the Company satisfies its contractual obligations, provided that all of the following conditions are met:

- The amount of revenue can be measured reliably. When the contract stipulates that the buyer is entitled to return the services provided under specific conditions, the revenue is recognized only when these specific conditions no longer exist and the buyers retain no right to return the services provided.
- The Company received or shall probably receive the economic benefits associated with the provision of services.
- The stage of completion of the transaction at the end of reporting period can be measured reliably.
- The costs incurred for the transaction and the costs to complete the transaction can be measured reliably.

When services are provided over several accounting periods, revenue is recognized by reference to the stage of completion based on the volume of work performed at the reporting date.

Revenue from construction contracts

Construction contract is a contract agreed for acquisition of an asset or combined assets closely relevant or mutually dependent on their design, technology, function or basic using purpose.

TRACODI CONSTRUCTION HOLDINGS JOINT STOCK COMPANY

Address: No. 89 Cach Mang Thang Tam Street, Ben Thanh Ward, Ho Chi Minh City

INTERIM FINANCIAL STATEMENTS

For the first 6 months of the fiscal year ending 31 December 2026

Notes to the Interim Financial Statements (cont.)

Revenue from construction contracts comprises the amount initially agreed in the contract and any adjustments arising during the contract performance that are mutually agreed by both parties, including changes in the scope of work, additional requirements, bonuses for early completion, or compensation or reimbursement of costs incurred in excess of the contract price, provided that such amounts can be reliably measured and are probable of being approved.

When the outcome of the construction contracts is estimated reliably:

- For the construction contracts stipulating that the contractors are paid according to the planned progress, revenue and costs related to these contracts are recognized in proportion to the stage of completion of contract activity as determined by the Company itself as of the reporting date.
- For the construction contracts stipulating that the contractors are paid according to the work actually performed, revenue and costs related to these contracts are recognized in proportion to the stage of completion of contract activity as confirmed by the customers and reflected in the invoices.

Increases/(decreases) in revenue of the works done, compensation receivable and other receivables are only recognized upon the agreement with customers.

When the outcome of the construction contracts cannot be estimated reliably:

- Contract revenue is recognized only to the extent that contract costs incurred are expected to be reliably recoverable.
- Contract costs are only recognized as actually incurred.

Where it is forecast that the total contract costs will exceed the gross contract revenue, the expected loss on the contract is recognized immediately as an expense in the period in which it is identified.

The difference between the accumulated revenue from the construction contract recognized and the accumulated amount in the invoices according to the planned progress of contract is recognized as an amount receivable or an amount payable relating to construction contracts under percentage of completion method.

Where it is forecast that the total contract costs will exceed the gross contract revenue, the entire expected loss on the contract is recognized immediately as an expense in the period in which it is identified, regardless of the stage of completion of the contract.

Interest

Interest income is recognized based on the term and the effective interest rate applicable in each particular period.

Profit received

Profit received is recognized when the Company is entitled to receive dividends or profits from investment activities.

15. Borrowing costs

Borrowing costs are interest and other costs that the Company incurs in connection with the borrowing.

Borrowing costs are recognized as an expense during the period when they are incurred, unless they are qualified for capitalized borrowing costs.

TRACODI CONSTRUCTION HOLDINGS JOINT STOCK COMPANY

Address: No. 89 Cach Mang Thang Tam Street, Ben Thanh Ward, Ho Chi Minh City

INTERIM FINANCIAL STATEMENTS

For the first 6 months of the fiscal year ending 31 December 2026

Notes to the Interim Financial Statements (cont.)

Borrowing costs that are directly attributable to the construction or the production of an asset in progress, which takes a substantial period of time (over 12 months) to get ready for intended use or sales, are capitalized as part of that asset when it is probable that they will result in future economic benefits to the Company and the borrowing costs can be reliably measured.

The capitalization of borrowing costs commences when all three of the following conditions are concurrently met:

- Expenditure for the construction or production of the asset has been incurred;
- Borrowing costs have been incurred; and
- Activities necessary to prepare the asset for its intended use or sale are being undertaken.

Capitalization is suspended during periods when the construction or production process is abnormally interrupted. Capitalization stops when substantially all activities necessary to prepare the asset for its intended use or sale have been completed.

For a specific borrowing for purpose of construction or production of an asset in progress, the capitalized borrowing costs are the actual borrowing costs incurred, less any investment income on the temporary investment of those borrowings.

In the event that general borrowings are partly used for the construction or production of an asset in progress, the costs eligible for capitalization will be determined by applying the capitalization rate to average accumulated expenditure on construction or production of that asset. The capitalization rate is computed at the weighted average interest rate of the borrowings outstanding during the period, except for borrowings made specifically for the purpose of obtaining an asset.

16. Expenses

Expenses are those that result in outflows of the Company's economic benefits and are recorded at the time of transactions or when incurrence of the transaction is reliable regardless of whether payment for expenses is made or not. Expenses are recognized even if they are not yet due for payment, provided that their incurrence is reasonably certain in order to ensure the principle of prudence and capital preservation.

When the Company recognizes revenue, it also recognizes the costs corresponding to generating that revenue. Such costs include those incurred in the reporting period in which the related revenue was recognized, together with costs incurred in the prior reporting periods or accrued expenses related to the revenue recognized in that period. In the event that matching principle conflicts with prudence principle, costs are recognized in accordance with the nature of the underlying transaction and the requirements of the applicable Vietnamese Accounting Standards in order to ensure true and fair representation of the transaction.

17. Corporate income tax

The Company's accounting policy for corporate income tax is applied in accordance with the provisions of the Corporate Income Tax Law No. 67/2025/QH15 dated 14 June 2025, the Decree No. 320/2025/NĐ-CP dated 15 December 2025 of the Government detailing certain articles of the Corporate Income Tax Law, guidance documents issued by the Ministry of Finance, and other relevant legal regulations. Corporate income tax includes current income tax and deferred income tax.

Current income tax

Current income tax includes the tax amount computed based on the assessable income during the year and the current corporate income tax rate. The assessable income is different from accounting profit due to the adjustments of temporary differences between tax and accounting figures, non-deductible expenses, non-taxable income and losses brought forward.

INTERIM FINANCIAL STATEMENTS

For the first 6 months of the fiscal year ending 31 December 2026

Notes to the Interim Financial Statements (cont.)

On a quarterly basis, the Company determines and recognizes the provisional corporate income tax payable. At the end of the fiscal year, the Company determines the actual corporate income tax payable based on the final tax return and adjusts any differences with the provisional amounts recognized during the year.

Deferred income tax

Deferred income tax is the amount of corporate income tax payable or refundable due to temporary differences between carrying values of assets and liabilities serving the preparation of the Financial Statements and the values for tax purposes.

Deferred income tax liabilities are recognized for all the temporary taxable differences, except to the extent that they arise from the initial recognition of an asset or liability in a transaction that, at the time of transaction, affects neither accounting profit nor taxable income.

Deferred income tax assets are recognized for all deductible temporary differences to the extent that future taxable income will be available against which the deductible temporary difference can be utilized. Deferred income tax assets are also recognized for unused taxable losses and tax credits to the extent that it is probable that future taxable profit will be available against which they can be utilized. Deferred income tax assets and deferred income tax liabilities arising from transactions recognized directly in owner's equity are not recognized into deferred income tax expenses.

The carrying amount of deferred corporate income tax assets is reviewed at each reporting date and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred income tax asset to be recovered.

Deferred income tax assets and deferred income tax liabilities are measured using the tax rates that are expected to apply in the period when the assets are recovered or the liabilities are settled, based on the effective tax rates and tax laws that have been enacted or substantively enacted by the reporting date.

When preparing the Statement of Financial Position, deferred income tax assets and deferred income tax liabilities are offset against each other if:

- The Company has the legal right to offset current income tax assets against current income tax liabilities; and
- Deferred income tax assets and deferred income tax liabilities are relevant to corporate income tax levied by the same taxation authority on either:
 - The same taxable subjects; or
 - The Company has intention to pay current income tax liabilities and current income tax assets on a net basis or recover tax assets and settle tax liability simultaneously in each future period in which significant amounts of deferred tax liabilities or deferred tax assets are expected to be settled or recovered.

18. Related party

A party is considered a related party of the Company if that party has the ability to control the Company or exercise significant influence over the Company, or has power to participate in financial and operating policy decisions of the Company. A party is also considered a related party of the Company if both parties are subject to common control.

TRACODI CONSTRUCTION HOLDINGS JOINT STOCK COMPANY

INTERIM FINANCIAL STATEMENTS

For the first 6 months of the fiscal year ending 31 December 2026

Notes to the Interim Financial Statements (cont.)

Related parties of the Company include:

- The Parent Company, subsidiaries, associates and fellow subsidiaries within the Group.
- Individuals with direct or indirect voting rights and thereby have significant influence over the Company, including members of the Board of Directors and their close family members.
- Key management personnel with the authority and responsibility to plan, manage and control the Company's operations, including the Board of Management, the Supervisory Board, other management members and their close family members.
- Entities over which individuals referred to above are able to exercise sufficient influence through direct or indirect ownership of voting rights, including entities owned by the key management personnel or major shareholders of the Company and entities that share the key management personnel with the Company.

Close family members of an individual are those who may cause influence or be influenced by that individual in their dealings with the Company, including the individual's parents, spouse, children and siblings.

Based on the substance of the economic relationship and with reference to international practice, the Company also considers the counterparties that jointly control over the BCC with the Company to be related parties.

A related party transaction is a transfer of resources, services or obligations between related parties, regardless of whether a price is charged.

In considering if parties are related, attention is directed to the substance of the relationship and not merely its legal form.

19. Segment reporting

A business segment is a distinguishable component of the Company that is engaged in manufacturing or providing an individual product or service or a group of related products or services, and that is subject to risks and returns that are different from those of other business segments.

A geographical segment is a distinguishable component of the Company that is engaged in manufacturing or providing products or services within a particular economic environment and that is subject to risks and returns that are different from those of components operating in other economic environments.

The nature of economic risks and benefits is the primary basis for determining whether the primary segment report is prepared by the business field or geographical area. If risks and rates of return are primarily influenced by differences in products and services, the primary segment report is prepared by the business segment and the secondary segment report is prepared by geographical area. Conversely, if risks and rates of return are primarily influenced by differences in geographical area, the primary segment report is prepared by geographical area and the secondary segment report is prepared by the business segment. The Company's organizational structure, management and internal financial reporting system form the primary basis for determining whether a segment report is primary or secondary.

A segment must be reported if the majority of its revenue derives from external sales of goods and provisions of services and meets at least one of the following thresholds:

- The segment's revenue accounts for 10% or more of the total revenue of all segments.
- The segment's financial performance accounts for 10% or more of the total financial performance of all profitable segments or the total financial performance of all loss-making segments (whichever is greater in absolute terms).
- The segment's total assets account for 10% or more of the total assets of all segments.

Information on the Company's financial performance, fixed assets, other non-current assets and remarkable non-cash expenses by the business segments is presented in attached Appendix 3.

2b. Information on geographical segments

All of the Company's business operations take place within Vietnam territory only.

3. Comparative figures

The accounting period from 01 January 2026 to 31 December 2026 is the first period when the Company applies the Vietnamese Enterprise Accounting System under Circular 99, replacing Circular 200.

The application of the new Accounting System has caused no material impact on the comparative figures. The Company has restated the comparative figures for certain items in the Interim Financial Statements for the first 6 months of the fiscal year ending 31 December 2026 in accordance with Circular 99. The restated items are as follows:

4. Going-concern assumption

The total accumulated loss as of 30 June 2026 was VND 1,715,203,313,928. As of 30 June 2026 and up to the reporting date, the Company has experienced certain difficulties in its business operations and financial position. Details are provided as below:

- Net cash flows used in operating activities during the period are negative;
- Some receivables become due but their recovery has been slower than expected;
- Some borrowings and financial lease liabilities have been overdue and reclassified to a higher risk category by credit institutions during the period;
- The Company's shares (stock code TCD) were officially delisted from the Ho Chi Minh City Stock Exchange (HOSE) pursuant to Decision No. 590/QĐ-SGDHCM dated 08 July 2026, with effect from 15 July 2026. Subsequently, the Company's shares were registered for trading on the UPCoM (Unlisted Public Company Market) of the Hanoi Stock Exchange under the stock code "TCD" pursuant to Decision No. 961 dated 17 July 2026 of the Hanoi Stock Exchange (see Note I.8);
- The Company's TCDH2227002 bonds have been suspended from trading since 20 March 2025 according to Notice No. 1161/TB-SGDHN dated 19 March 2025 of the Hanoi Stock Exchange (see Note No. V.18b).

The foregoing events and conditions show the existence of material uncertainties that may cause significant doubt on the Company's ability to continue as a going concern.

Nevertheless, the Board of Management believes that the preparation of the Interim Financial Statements on the going concern basis remains appropriate based on the following considerations:

- In fact, the Company has continued to operate in the normal course of business and has fulfilled its major financial obligations after 30 June 2025 to the reporting date;
- The Board of Management is implementing measures to improve the Company's financial position and cash flows, including the divestment and disposal of certain investments, accelerating the collection of receivables, and negotiating with credit institutions to restructure the Company's existing borrowings and debt classifications;
- The Board of Management believes that these measures will generate necessary cash flows to enable the Company to fulfill its financial obligations as they fall due and to continue its operations for at least 12 months from the issuance date of these Interim Financial Statements.

The Company's ability to continue as a going concern depends on the successful implementation of the above measures, particularly the divestment, recovery of receivables and restructuring of existing borrowings. Accordingly, these Interim Financial Statements were prepared on the going concern basis and do not include any adjustments that may be necessary if the Company were unable to continue as a going concern - including the revaluation and reclassification of assets and liabilities at their recoverable or disposable amounts, as well as the recognition of additional liabilities (if any).

5. Significant accounting judgements, estimates and assumptions

In preparing these Interim Financial Statements, the Board of Management has made estimates and assumptions that affect the reported amounts of assets, liabilities, revenue and expenses. Actual results may differ from these estimates. Significant accounting judgements, estimates and assumptions are reviewed and updated by the Board of Management on an ongoing basis based on historical experience and other relevant factors.

INTERIM FINANCIAL STATEMENTS

For the first 6 months of the fiscal year ending 31 December 2026

Notes to the Interim Financial Statements (cont.)

The estimates listed below are assessed by the Board of Management as carrying a risk of leading to a material adjustment to the carrying amounts of assets and liabilities in the next fiscal year should the underlying assumptions change.

Provision for losses on investments in other entities

The Company estimates provisions for losses of investments in subsidiaries, associates and other investments based on the extent of impairment of each investment. This estimate depends on forecasts of the financial position and business prospects of the investee and is therefore subject to uncertainty.

As of 30 June 2026, the value of investments in subsidiaries, associates and equity investments in other entities was VND 2,012,915,943,856, of which a provision of VND 592,177,016,021 was made. The Board of Management assesses the likelihood of actual losses exceeding the provision already made as low. Risk mitigation measures include:

- Regularly monitoring the business performance of investees and requiring them to submit business plans;
- Assessing indicators of impairment at each reporting date in accordance with regulations;
- Proceeding with the legal formalities to liquidate underperforming investments.

Provisions for losses on loans and held-to-maturity investments

The Company estimates provisions for loan and held-to-maturity investments, including the principal and interest of fixed-interest-bearing BCCs, based on the recoverability and impairment of each item. The estimates are dependent on forecasts of the financial position, cash flows and solvency of the counterparties and therefore involve significant uncertainty.

As of 30 June 2026, the total carrying amount of loans and held-to-maturity investments was VND 1,216,629,273,238, of which a provision of VND 328,296,571,824 was made (short-term: VND 191,466,571,824, long-term: VND 136,830,000,000). The Board of Management assesses that the likelihood of actual losses exceeding the provisions already made is uncertain, based on the current financial situation of the counterparties. Risk mitigation measures include:

- Monitoring the financial position and repayment capacity of each counterparty; urging and negotiating the recovery of principal and interest;
- Reviewing and requesting collateral, and offsetting debts when eligible;
- Initiating legal proceedings or taking legal action against overdue receivables.

Allowance for doubtful debts

The Company estimates the allowance for doubtful debts based on an assessment of the recoverability of individual receivable balances, taking into account debt ages, customers' financial condition; consequently, there is an element of uncertainty.

As of 30 June 2026, the total balance of short-term trade receivables was VND 619,807,124,161, for which the Company made an allowance of VND 12,314,550,024. Based on customers' payment history and available information regarding the financial situation of each debtor, the Board of Management is unable to certainly determine whether actual losses will exceed the allowance made. Risk mitigation measures include:

- Regularly monitoring and following up the recovery of receivables;
- Requiring collateral or guarantees for large-value debts and reviewing each customer's credit limit on a quarterly basis;
- Initiating legal proceedings or other legal enforcement actions against overdue receivables where appropriate.

INTERIM FINANCIAL STATEMENTS

For the first 6 months of the fiscal year ending 31 December 2026

Notes to the Interim Financial Statements (cont.)

Estimated useful lives and residual values of fixed assets

The Company estimates the useful lives of fixed assets based on technical assessments and actual operating experience. Changes in technology, usage intensity or maintenance conditions may cause the actual useful life to differ from the initial estimate.

As of 30 June 2026, the Board of Management has not identified any factors that would require significant revisions to the assumptions currently applied and assessed the likelihood of material differences from the estimates as low for the majority of assets. Risk mitigation measures include:

- Reviewing and, where appropriate, revising estimated useful lives on an annual basis;
- Carrying out regular maintenance in accordance with technical procedures and assessing signs of impairment at each reporting date;
- Planning timely replacement of assets to minimize disruptions to business operations.

Estimates of the progress of construction projects

Revenue from construction activities is recognized based on the value of workload performed, as determined and confirmed in accordance with the terms of the contract and relevant acceptance records. As of 30 June 2026, all of the Company's projects were in the construction phase; assessing the likelihood of completion and the handover date requires the Board of Management to make assumptions based on the actual construction progress, legal situation, contractor capacity, land clearance progress and the investor's ability to arrange capital and fulfill payment obligations.

The Board of Management assesses that some projects may experience delays in handover compared to the plan due to the investor facing financial difficulties; this may affect the timing of work acceptance and, thereby affecting the timing, value of revenue and profit recognized in future accounting periods. Mitigation measures include:

- Assigning dedicated staff to monitor and handle legal procedures and liaise with the relevant government authorities to expedite the approval process;
- Drawing up contingency construction plans (overtime, additional manpower) to catch up on schedule;
- Regularly updating clients on progress and negotiating adjustments to handover deadlines for objective delays in accordance with the contract terms.

Estimation of corporate income tax and deferred tax

The determination of income tax expense and deferred tax assets/tax liabilities requires the Board of Management to exercise judgement regarding the application of prevailing tax regulations, the probability of generating sufficient future taxable profits against which deferred tax assets can be utilized, and the potential outcomes of tax audits and assessments by the tax authorities.

As of 30 June 2026, the Company had unrecognized deferred income tax assets of VND 1,784,657,742,731 arising from taxable losses carried forward and temporarily deductible differences, due to uncertainty regarding the availability of sufficient future assessable income. If taxable profits in coming years are lower than estimated, this deferred tax asset may continue to be ineligible for recognition. The Board of Management assesses the likelihood of actual taxable profits being significantly lower than planned as low. Risk mitigation measures include:

- Reviewing the recoverability of deferred tax assets on an annual basis;
- Consulting tax specialists regarding the application of tax regulations to complex transactions;
- Maintaining adequate supporting documentation to facilitate explanations and compliance during tax inspections and tax audits; and
- Closely monitoring developments in tax legislation and updating tax estimates, where necessary, on a timely basis.
