- Profit after tax in the first half of 2025: VND 3,791,020,595

Reasons for the changes of more than 10% in profit after income tax in the reviewed separate and consolidated financial statements for the first half of 2026 compared to the statements of the same period in the previous year:

Compared to the first half of 2025, the aviation market experienced significant growth, particularly on international routes. Concurrently, the Company improved its operational efficiency across airport business locations. These were the primary factors driving a year-on-year increase of over 10% in mid-year profit after tax in both the separate and consolidated financial statements for 2026.

Cam Ranh International Airport Services Joint Stock Company provides this explanation regarding the profit after tax fluctuations in its reviewed semi-annual reports.

Sincerely!
