6.2 Explanation of the net profit after tax for the Third quarter of 2026 recording a loss, and changing by more than 10% compared to the same period last year

The Company recorded a net loss in Q3 2026; however, the loss decreased by 79.47% compared to the same period last year. The main reasons are as follows:

- Due to the challenging economic conditions and difficulties in the consumer market, the Company continues to face pressure from high-cost inventories, while selling prices remain insufficient to cover the cost of goods sold, resulting in a negative gross profit for the period.

- The Company's after-tax loss in Q3 2026 decreased by 79.47% compared to the same period of the previous year, mainly because the Company incurred a significant other loss of approximately VND 11 billion in Q3 2025 arising from the disposal of intangible fixed assets in connection with a real estate transfer. Meanwhile, in Q3 2026, the Company did not incur any unusual losses or significant other expenses similar to those recorded in the same period of the previous year, thereby contributing to a reduction in the after-tax loss for the period.
