Pursuant to Clause 4.a, Article 14 of Circular 96/2020/TT-BTC dated November 16, 2020 of the Ministry of Finance guiding the disclosure of information on the stock market.

Based on the Financial Statements for the third quarter of 2026, Ha Bac Nitrogenous Fertilizer and Chemicals Joint Stock Company (stock code: DHB) provides the following explanation:

The Company's profit after tax for the third quarter of 2026 reached VND 135.9 billion, an increase of VND 231.8 billion compared to the third quarter of 2025. The primary reasons are as follows:

- Production operations were more stable than in the same period of 2025 (in the third quarter of 2025, the Company experienced operational issues that necessitated a prolonged shutdown for repairs, resulting in reduced production output). Furthermore, market conditions for fertilizers were favorable, with both global and domestic urea prices remaining strong. The combination of increased production volume and favorable selling prices led to a significant rise in sales revenue-reaching 112% of the figure from the same period last year-which contributed to highly positive business performance.

- Financial expenses for the third quarter of 2026 decreased by VND 24 billion compared to the same period, as the Company effectively restructured its debt, leading to a substantial reduction in interest costs.

The above serves as the explanation from Ha Bac Nitrogenous Fertilizer and Chemicals Joint Stock Company regarding its business performance for the third quarter of 2026.

Thank you very much!
