3.Binh Phuoc Water Supply And Sewerage Joint Stock Company	Dong Nai Province	36,1%	36,1%	Exploitation, treatment, water supply, and sewage systems

II. BASIC OF PREPARATION OF FINANCIAL STATEMENTS

Basic preparation of separate financial statements

The separate financial statements have been prepared in Vietnamese Dong (VND), and have been prepared under the historical cost convention and by the Vietnamese Accounting Standard, the Vietnamese Corporate Accounting System, and applicable regulations on the preparation and presentation of financial statements.

The accompanying financial statements are not intended to present the financial position and results of operations and cash flows in accordance with accounting principles and practices generally accepted in countries and jurisdictions other than Vietnam. The accounting principles and practices utilized in Vietnam may differ from those generally accepted in countries and jurisdictions other than Vietnam.

Fiscal year

The company's fiscal year is from 1 January to 31 December.

The financial statements have been prepared for the period from July 1st, 2026 to September 30th, 2026.

III. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Below are the significant accounting policies applied by the Company in preparing the separate financial statements:

Accounting Estimate

The preparation of financial statements in conformity with Vietnamese accounting standards, the corporate accounting regime, and relevant legal regulations require the Board of Directors to make estimates and assumptions that affect the reported amounts of liabilities, assets, and the disclosure of contingent.

Liabilities and assets as of the financial statement date, as well as the reported amounts of revenue and expenses during the operating period. Although the accounting estimates are based on the best knowledge of the Board of Directors, actual results may differ from the estimates and assumptions made.

Basis of preparation of financial statements

The consolidated financial statements are prepared by combining the financial statements of the Parent Company and those of its subsidiaries, which are controlled by the Parent Company. Such control is established when the Parent Company has the ability to direct the financial and operating policies of the investee companies to gain benefits from their operations.

The operating results of subsidiaries acquired or disposed of during the period are included in the consolidated income statement from the acquisition date or until the disposal date of the investment in those subsidiaries.

In necessary circumstances, the financial statements of subsidiaries are adjusted to align the accounting policies applied by the Parent Company and its subsidiaries.

All intercompany transactions and balances within the Company are eliminated during the consolidation process.

FINANCIAL STATEMENT FOOTNOTES (CONT)

FORM B 09-DN/HN

These notes are an integral part of the consolidated financial statements and should be read together with them.

Non-controlling interests in the net assets of consolidated subsidiaries are identified as a separate component from the equity of the Parent Company's shareholders and are presented as an equity item in the consolidated balance sheet. Non-controlling interests include the value of non-controlling shareholders' interests at the initial date of the business combination and their share in changes in total equity since the combination date. Losses incurred by a subsidiary are allocated to non-controlling interests proportionate to their ownership, even if this results in the non-controlling interests having a deficit balance in the subsidiary's net assets.

Business Consolidation

The assets, liabilities, and contingent liabilities of a subsidiary are measured at their fair values at the acquisition date. Any excess of the purchase price over the total fair value of the acquired assets is recognized as goodwill. Any deficit between the purchase price and the total fair value of the acquired assets is recognized in the income statement for the accounting period in which the subsidiary is acquired.

Non-controlling interests at the initial business combination date are determined based on the proportionate share of non-controlling shareholders in the total fair value of recognized assets, liabilities, and contingent liabilities.

The effects of transactions that change the Company's ownership percentage in subsidiaries but do not result in a loss of control are recognized directly in retained earnings on the consolidated balance sheet for the period.

Investment in Associates

An associate is a company having significant influence but neither control nor joint control. Significant influence is defined as the ability to participate in the financial and operational policy decisions of the investee but not to control or jointly control those policies.

Investments in associates are consolidated in the financial statements using the equity method. Under this method, the initial investment is recorded at cost, and subsequently adjusted for changes in the Company's share of the associate's net assets after the acquisition date. Losses of an associate that exceed the Company's interest in that associate (including any long-term investments that, in substance, form part of the Company's net investment in the associate) are not recognized.

When a Company subsidiary transacts with an associate, unrealized profits or losses corresponding to the Company's interest in the associate are eliminated from the consolidated financial statements.

Joint Ventures

Joint ventures represent contractual arrangements where the Company and other parties undertake economic activities under joint control. Joint control refers to the sharing of strategic decision-making regarding the financial and operational policies of the joint venture, requiring the agreement of all joint venture participants.

Joint venture arrangements that establish a separate legal entity, in which the joint venture partners have equity interests, are classified as jointly controlled entities. The Company accounts for its interests in jointly controlled entities using the equity method.

Goodwill

Goodwill in the consolidated financial statements is the excess of the acquisition cost over the Company's share of the fair value of the net assets, liabilities, and contingent liabilities of subsidiaries, associates, or jointly controlled entities at the acquisition date.

Goodwill arising from the acquisition of subsidiaries is recognized as a long-term asset on the consolidated balance sheet and is amortized on a straight-line basis over its estimated useful life, not exceeding 10 years.

When a subsidiary is sold, the remaining goodwill is included in the calculation of the gain or loss on the sale. The Company evaluates goodwill for impairment periodically. If evidence indicates that the goodwill impairment exceeds the annual amortization, the impairment amount is recognized in the consolidated income statement.

Goodwill arising from the acquisition of associates and jointly controlled entities is included in the carrying amount of the respective investments. This goodwill is not amortized.

FINANCIAL STATEMENT FOOTNOTES (CONT)

FORM B 09-DN/HN

These notes are an integral part of the consolidated financial statements and should be read together with them.

Cash and cash equivalents

Cash and cash equivalents include cash on hand, demand deposits, and short-term investments that are highly liquid and have the original maturity not exceeding three months from the date of investment, readily convertible to cash, and subject to an insignificant risk of changes in value.

Financial Investment

Held-to-maturity investments

Held-to-maturity investments include those investments that the Company has the intention and ability to hold until maturity. These investments include: term deposits at banks (including various types of promissory notes

and certificates of deposit), bonds, redeemable preference shares that the issuer is obliged to repurchase at a specific future date for periodic interest income, and other held-to-maturity investments.

Held-to-maturity investments are recognized from the purchase date and initially measured at cost, which includes the purchase price and any transaction-related expenses. Interest income earned from these investments after the purchase date is recognized on an accrual basis in the statement of profit or loss. Any interest accrued before the Company's purchase date is deducted from the cost at the time of purchase.

These investments are measured at cost, less any allowance for doubtful debts. Allowances for doubtful debts related to held-to-maturity investments are established in accordance with the applicable accounting regulations.

Investments in Equity Instruments of Other Entities

Investments in equity instruments of other entities refer to equity instrument investments in which the Company does not have the right to control, joint control, or significant influence over the investee.

Investments in equity instruments of other entities are initially recognized at their original purchase cost. If the value of these investments decreases at the reporting date, the Company recognizes an impairment allowance to reflect this loss in value.

The provision for impairment is calculated based on the Company's ownership percentage in the invested organizations, following the guidelines of Circular 48/2019/TT-BTC dated August 8, 2019.

Receivables

Receivables represent amounts that are able to be received from customers or other parties. Receivables are also presented based on book value minus all provisions for bad debts.

Provisions for doubtful debts are established for past-due receivables outlined in economic contracts, debt agreements, loan agreements, or other binding documents. They are also created for receivables that are not yet due but are assessed as unlikely to be collected. For past-due receivables, the provision is calculated based on the original repayment schedule as stated in the contract, without considering any later extensions. For receivables that are not yet due, provisions are made if the debtor has entered bankruptcy, liquidation, dissolution, or if the debtor is untraceable or has absconded.

Loans

Loans refer to amounts lent under agreements between parties but are not traded on the market like securities.

Loans are recorded at cost, net of allowances for doubtful debts. Allowances for loan-related doubtful debts are recognized following prevailing accounting standards.

Inventories

Inventories are valued at a lower cost and net realizable value. Cost of inventories includes direct materials, direct labor, and applicable manufacturing overheads, if possible, bringing inventories to their present location and condition. Inventory costs are determined using the weighted average method. Net realizable value is estimated as the expected selling price less estimated costs to complete the product and costs to market, sell, and distribute.

FINANCIAL STATEMENT FOOTNOTES (CONT)

FORM B 09-DN/HN

These notes are an integral part of the consolidated financial statements and should be read together with them.

Provisions for inventory devaluation are established in accordance with applicable accounting regulations. Accordingly, the Company may create provisions for obsolete, damaged, or substandard inventories or when the cost of inventories exceeds their net realizable value as of the date of the interim consolidated financial statements. Provision expenses for obsolete, damaged, or substandard inventories are not deductible for corporate income tax purposes until the inventory is liquidated.

Non-current Equipment, Supplies, and Spare Parts

Long-term equipment, supplies, and spare parts are items reserved for replacement or preventive maintenance of assets, not meeting the criteria to be classified as fixed assets, and stored for over 12 months or beyond a standard operating cycle. These items are presented on financial statements at net value (after deducting any devaluation provisions). Provisions for the devaluation of long-term equipment, supplies, and spare parts are made following applicable accounting standards, similar to inventory provisions.

Tangible Fixed Assets and Depreciation

Tangible fixed assets are recorded at historical cost, less accumulated depreciation. The historical cost includes the purchase price and all directly attributable costs required to bring the asset to a working condition.

The historical cost of self-constructed or self-built tangible fixed assets comprises actual construction costs incurred, production costs, installation costs, and testing costs.

Tangible fixed assets are depreciated using the straight-line method over their estimated time, as follows:

	Useful Life (Years)
Buildings and structures	04 - 40
Machinery and equipment	03 - 20
Transportation and transmission vehicles	03 - 30
Office equipment	03 - 08
Others	15

Gains or losses on disposal or sale of assets are determined as the difference between the proceeds from disposal and the asset's residual value and are recorded in the consolidated statement of profit and loss.

Intangible fixed assets and depreciation

Intangible fixed assets include land use rights and software, recorded at historical cost less accumulated amortization.

Land use rights with a definite term are amortized using the straight-line method over their lease term. Indefinite-term land use rights are not amortized under current regulations.

Computer software is amortized using the straight-line method over a period of 3 to 10 years.

Construction-in-Progress

Assets under construction intended for production, leasing, administration, or other purposes are recorded at cost, including service costs and borrowing costs directly attributable to the asset, following the Company's accounting policies. Depreciation for these assets follows the same policy as other fixed assets, commencing when the asset is ready for use.

Prepaid Expenses

Prepaid expenses include the value of tools, small components already issued for use, and other prepaid costs deemed to generate future economic benefits for the Company. These expenses are capitalized as prepaid assets and allocated to the income statement using the straight-line method in accordance with prevailing accounting regulations.

FINANCIAL STATEMENT FOOTNOTES (CONT)

FORM B 09-DN/HN

These notes are an integral part of the consolidated financial statements and should be read together with them.

Liabilities

Liabilities are tracked in detail based on payment terms, counterparties, types of currency payable, and other management requirements of the Company. Liabilities are categorized into commercial liabilities arising from the purchase of goods and services and non-commercial liabilities unrelated to trading activities. They are classified as short-term or long-term on the balance sheet, depending on the remaining terms of the liabilities as of the financial reporting date.

Provisions

Provisions are recognized when the Company has a present obligation resulting from past events, and it is probable that the Company will have to settle this obligation. Provisions are determined based on the General Director's estimates of the costs required to settle the obligations at the financial year-end.

Accrued Expenses

Accrued expenses include amounts payable for goods or services received by the Company or provided to customers during the reporting period but not yet paid due to the absence of invoices or incomplete documentation. These are recognized in the reporting period's production and business expenses.

Equity Recognition

Equity is recognized based on the actual contributed capital of the shareholders.

Share premium is recorded as the difference between the actual proceeds and the par value of shares issued during the initial offering, subsequent offerings, or re-issuance of treasury shares.

Other owner's equity is recognized as the residual value of assets received as donations or gifts, net of related taxes.

Undistributed post-tax profits are recognized as the profit (or loss) from the Company's business activities after corporate income tax and adjustments for retrospective changes in accounting policies and material errors from prior years.

Reserves and funds derived from post-tax profits are allocated based on the Company's charter and shareholder meeting resolutions.

Revenue Recognition

Revenue from Goods Sales

Revenue from the sale of goods is recognized when all five (5) of the following conditions are met:

- (a) The Company has transferred most of the risks and rewards associated with ownership of the goods to the buyer;
- (b) The Company no longer retains managerial involvement or control over the goods;
- (c) Revenue can be measured reliably;
- (d) It is probable that the Company will collect the economic benefits from the sale; and
- (e) The costs associated with the sale can be identified.

Revenue from Services

Revenue from service transactions is recognized when the outcome of the transaction can be reliably measured. For service transactions spanning multiple periods, revenue is recognized in the reporting period based on the stage of completion as of the balance sheet date, provided the following four (4) conditions are met:

- (a) Revenue can be measured reliably;
- (b) It is probable that economic benefits will flow to the Company;
- (c) Determine the stage that was accomplished at the balance sheet date; and
- (d) Determine the incurred cost for transactions and costs that accomplish transactions in supplying services.

FINANCIAL STATEMENT FOOTNOTES (CONT)

FORM B 09-DN/HN

These notes are an integral part of the consolidated financial statements and should be read together with them.

Financial Revenue

Interest income from deposits and loans supports capital and is recognized on an accrual basis, determined by account balances, loans, and applicable interest rates unless the recovery of interest is uncertain.

Dividends and profit sharing are recognized when the Company is entitled to receive them. Dividends received in the form of shares are tracked only by the additional number of shares, without recognizing their par value.

Cost of Sales Recognition

The cost of sales and services provided is recognized based on actual incurred costs and allocated according to the volume and value of goods or services delivered to customers, adhering to revenue matching and prudence principles. Abnormal costs of inventory or services are recognized immediately as expenses in the period incurred.

Borrowing Costs

Borrowing costs are recognized as production and business expenses in the year incurred, except for cases eligible for capitalization under the accounting standard for borrowing costs. Borrowing costs directly related to acquiring, constructing, or producing qualifying assets are included in the time until it is ready for intended use or sale. Income from the temporary investment of borrowings is deducted from the asset's cost. For specific loans for fixed asset construction or investment in real estate and interest capitalized even if the construction period is less than 12 months.

Taxes

Corporate income tax (CIT) includes current and deferred tax expenses.

Current tax is calculated based on taxable income for the year. Taxable income differs from profit before tax presented in the income statement because taxable income excludes income or expenses taxable or deductible in other periods (including carried-forward losses, if any). Additionally, taxable income does not include non-taxable items or non-deductible expenses.

Deferred income tax is calculated on the differences between the carrying amounts and the tax bases of assets or liabilities presented in the financial statements and is recognized using the balance sheet method. Deferred income tax liabilities are recognized for all taxable temporary differences, while deferred income tax assets are recognized only to the extent that it is probable that future taxable profits will be sufficient to utilize the temporary differences.

Deferred income tax is determined based on the tax rates expected to apply in the year when the assets are recovered or the liabilities are settled. Deferred income tax is recognized in the income statement and is only recorded directly in equity if it relates to items that are also recognized directly in equity.

Deferred income tax assets and deferred income tax liabilities are offset when the Company has a legal right to offset current income tax assets against current income tax liabilities, and when the deferred income tax assets and liabilities relate to income taxes levied by the same taxation authority. Additionally, the Company must intend to settle current income tax liabilities on a net basis.

Pursuant to Decree No. 69/2008/NĐ-CP dated May 5th, 2008, by the Government: clean water business operations that are socialized are eligible for CIT as follows: The preferential CIT rate of 10% applies throughout the Company's operational period, along with a 4-year tax exemption commencing with the first year of the Company generates taxable income. Furthermore, a 50% reduction in payable taxes is granted for the next 9 years. However, these regulations sometimes change over the period and the final determination of CIT obligations depends on the results of inspections conducted by the competent tax authorities. Additionally, it is contingent on the specific conditions and business performance of each company, which may lead to different tax rates and durations of preferential treatment. Other business activities are subject to a standard tax rate of 20%.

Other taxes are applied in accordance with prevailing Vietnamese tax laws.

FINANCIAL STATEMENT FOOTNOTES (CONT)

FORM B 09-DN/HN

These notes are an integral part of the consolidated financial statements and should be read together with them.

Related Parties

Related parties are entities and individuals if they directly or indirectly through one or more parties, have the right to control the Company, are being controlled by the Company, or are under common control with the Company. Related parties, individuals that directly or indirectly hold voting power in the Company and have significant influence over the Company; key positions such as General Manager, Officers of the Company; close family members of these individuals; and entities affiliated with such individuals.

When assessing the relationship of each related party, the substance of the relationship is considered, rather than the legal form.

Segment Reporting

A segment is a distinguishable component of the Company that engages in providing related products or services (business segment) or in providing products or services within a specific economic environment (geographical segment) and is subject to risks and economic returns different from those of other segments.

The Board of Management identifies the Company's operating segments by business activities, which include clean water supply, sales of materials, consultancy, construction, equipment installation, and other activities, as well as by geographical regions, covering the following areas: Ho Chi Minh City, Gia Lai Province, and Lam Dong Province. Segment reports will be prepared based on business activities and geographical regions.

(*) Long-term interest expenses from Bank of Investment and Development of Vietnam – Nam Gia Lai Branch, has been restructured by the bank in terms of repayment schedule. Accordingly, both parties have agreed to extend the loan repayment term until 2036. The bank will prioritize the collection of principals first, with the principal repayment schedule extending at the latest until the end of 2029. The annual repayment amount shall be at least 60% of the Saigon – An Khe Water Joint Stock Company's actual revenue, a subsidiary. In 2036, the Group is required to settle all accrued interest, including penalty interest and other related fees.

These notes are an integral part of the consolidated financial statements and should be read together with them.

- (i) *The outstanding balance payable to Manila Water South Asia Holding Pte. Ltd. (Manila") relates to the Share transfer agreement of Cu Chi Water Supply Sewerage Joint Stock Company. According to The Resolution of the Extraordinary General Meeting of Shareholders dated 24 November 2023 and Share Purchase Agreement dated 25 December 2023, the Company agreed to convert this debt into newly issued shares of the Company, with an expected completion timeline of February 2025. At the date of this report, the parties are still in discussions to agree on the detailed implementation plan.*
- (ii) *Reflecting the financial liability for the received funds and interest payable under the asset transfer contract for future-formed assets with corporate partners. The contract has a duration of 12 years, with the final refund scheduled for 10 April 2036.*
- (iii) *Long-term borrowing interest expenses of Vietnam Joint Stock Commercial Bank for Industry and Trade - Bien Hoa Industrial Park Branch (Note 21), have been restructured by the bank in terms of repayment schedule. Accordingly, 30% of interest expenses incurred from the first quarter of 2023 to 25 October 2027 will be accumulated and divided equally over the period from the repayment date of 25 January 2028 to 27 January 2031. According to the notice dated 15 April 2025 from the Bank, the Company will stop retaining 30% of the interest expenses as noted above starting from the second quarter of 2025.*

VI. OTHER INFORMATION

1. SEGMENT REPORTING

To meet management purposes, the Company's organizational structure is divided into various departments. Accordingly, the primary segment report is based on the type of business activity. The Company does not report by geographical area, as its core operations and service delivery are primarily concentrated in Ho Chi Minh City. Business activities in other provinces and cities across the country are not considered material.

The segment report includes: items that are directly allocated to a segment as well as items allocated to segments based on a reasonable allocation method. Unallocated items include: assets, liabilities, financial income, financial expenses, selling expenses, administrative expenses, other gains or losses, and corporate income tax.

The primary activities of the business segments are as follows::

- Consulting and Construction Segment: Provision of consulting, construction, supply, and installation services for environmental treatment equipment in the water sector.
- Clean Water Business Unit: Engaged in the supply of clean water

THE CONSOLIDATED FINANCIAL STATEMENT FOOTNOTES (CONT)
