Profit after corporate income tax for the first 9 months of 2026 decreased compared to the first 9 months of 2025 as presented in the Consolidated Financial Statements Quarterly III/2026 mainly due to the following reasons:

- Revenue from sales of goods and rendering of services decreased by 16.07% compared to the same period last year, mainly due to a 61.89% decrease in revenue from industrial park operations.

- Cost of goods sold decreased by 1.04%. As the decrease in cost of goods sold was lower than the decrease in revenue, gross profit from sales of goods and rendering of services decreased by 33.58% compared to the same period last year.

- Share of the profit of associates decreased by 2.82%.

- Net other income decreased by 67.71%.

These factors led to total accounting profit before tax falling by 34.80%, causing profit after corporate income tax to drop by 34.69% year-on-year.

Sonadezi Corporation provides an explanation to the State Securities Commission, the Hanoi Stock Exchange and shareholders for information.

Sincerely.

Related parties also include members of the Group's key management personnel, their close family members and entities that are related in accordance with the applicable accounting standards.

4.30. Basis of consolidation

The consolidated financial statements are the financial statements of a Group in which the assets, liabilities, equity, income, expenses and cash flows of the parent and subsidiaries are presented as those of a single economic entity regardless of the legal structure of the entities. The financial statements of the subsidiaries have been prepared for the same financial year using uniform accounting policies to those used by the parent company. Adjustments were made for any different accounting policies to ensure consistency between the subsidiaries and the parent company.

A subsidiary is fully consolidated from the acquisition date on which the Group obtains control over the subsidiary until the date on which the parent ceases to control the subsidiary, unless control is intended to be temporary because the subsidiary is acquired and held exclusively with the intention of selling or disposing of it within twelve months.

Non-controlling interest recognition

Non-controlling interests in the net assets and net results of consolidated subsidiaries are shown separately in the consolidated statement of financial position and in the consolidated income statement.

The loss of a subsidiary is attributed to the non-controlling interests in proportion to their relative interests in the subsidiary even if this results in the non-controlling interests having a deficit balance.

Profit or loss recognition in changes in ownership interests in subsidiaries

Changes in the Group's ownership interest in a subsidiary that do not result in the Group losing control are accounted for as equity transactions. The carrying amounts of the Group's and the non-controlling interests are adjusted to reflect the changes in their relative interests in the subsidiary. Any difference between the amount by which the non-controlling interests are adjusted and the fair value of the consideration paid or received is recognised directly in equity in the consolidated statement of financial position.

Upon loss of control of a subsidiary, the Group's profit or loss is calculated as the difference between the fair value of the consideration received and the respective carrying amount of the net asset of the subsidiary plus the remaining balance of goodwill at the date when control is lost.

Intra-group transactions elimination

All intra-group transactions, balances, income, and expenses - including unrealised intra-group profits or losses - are eliminated in full on consolidation. Unrealised losses resulting from intra-group transactions that are deducted in arriving at the carrying amount of assets are also eliminated unless the cost cannot be recovered.
